TECHNICAL DATA SHEET

Ecomano. An user friendly and ecologically safe naturally pure hand cleaner.

Product description

Ecomano is a unique heavy duty hand cleaner for the removal of heavy ground-in dirt and grime. The fact that Ecomano does not contain any solvents and its biodegradability makes the product unique. Ecomano contains a detergent based on coconut oil, which results in extra cleaning power. Ecomano is very economical in use because of its extreme cleaning power.

Contains no abrasives that cause chapping but a scrub based on burnt rice husks, which is friendlier to the skin.

Solution areas

- Extreme dirty hands often are difficult to clean
- Traditional hand cleaners, containing abrasives, cause cracked skin and little wounds
- Oil, grease, ink, soot and creosote are very difficult to remove
- Contaminations can cause skin diseases
- Poor hand cleaners leave dirt and product residues behind, which causes unhygienic situations during e.g. eating and drinking
- Hand cleaners with poorly biodegradable solvents cannot be drained into the surface water freely

Sustainable solution

Ecomano will even clean heavily contaminated hands. Ecomano can be safely used on the skin and is completely ecologically safe. Ecomano removes oil, grease, tar, paint, printing ink, colour agents, soot, earth, ground dirt, creosote etc.

Special advantages

- Ecomano is solvent free
- Ecomano is ecologically safe
- Ecomano is fully biodegradable
- Ecomano is free of alkaline and phosphates
- Ecomano contains a detergent based on coconut oil, which results in extra cleaning power
- Ecomano is economical in use because of its high cleaning power
- Ecomano contains no abrasives that cause chapping but a scrub based on burnt rice husks.
- Ecomano prevents hands from cracking, little wounds and roughness
- Ecomano is natural pure, hygienic and skin protective
- Ecomano works very fast

Areas of application

Ecomano can be used to clean the most heavily contaminated hands.

Remarks

Seen its multipurpose characteristics, Ecomano is suitable for the food processing industry.

It can play an essential role for food processing companies that have to work according to HACCP standards. Contamination is a “critical point” and must be kept under close surveillance. Ecomano contributes to a controlled working environment.

*Is an independent German research institute that issues certificates for adequacy of cleaning products for the food industry.

Product instructions

Use Ecomano very economically. Take a small quantity in your dry hands. Rub in Ecomano all over your hands and rinse with water.

Packing material

Eco-Point International products are packed in polyethylene H.D. or metal drums. When repeat orders are being delivered, used drums which are empty and not polluted are collected free of charge for recycling or reconditioning purposes. When incinerated, polyethylene has no harmful effect on the environment.

Eco-Point sprayers are made of PE or PET: light weight, little raw material per bottle, low production energy consumption, virtually unbreakable and therefore long life, little waste during production and recycling, no harmful substances when incinerated, 100% recyclable.
